ABSTRACT

This book contains activities designed to help teachers enrich the mathematical experiences of all children and reach toward fulfillment of the National Council of Teachers of Mathematics (NCTM) Standards. Chapters include: (1) "Prenumber, Number, Non-Number"; (2) "Place Value"; (3) "Addition, Subtraction"; (4) "Multiplication, Division"; (5) "Fractions: Common, Decimal"; (6) "Geometry"; (7) "Estimation"; (8) "Calculations"; (9) "Miscellaneous Mathematical Concepts"; and (10) "Problem Solving". The appendix contains an annotated bibliography of children's books which are helpful in the teaching of mathematics and were chosen because of their proclivity for integrating mathematics instruction through their story line.
